Name : KN95 Facemasks CNAS Tested

Description :

Sold in packs of 10

These masks Filtration level is even greater than 95% required to be KN95.

Under testing they performed to 99% filtration. **Note:** Both surgical and cloth masks have no filtration testing requirements and are significantly lower in filtering small particles

SPECS:

Multiple Layer & Premium Quality: Inner hydrophilic layer+ filtering layer + hydrophobic layer

Made of high quality material

Safe, soft and comfortable

Prevent Droplets & 95% Filtration by covering the mouth and nose, it prevents droplets from spreading

Simple steps for wearing

One Size Fits All

Elastic straps and adjustable nose clip for different face shapes and sizes

Please note: that the testing clearly demonstrates the masks are compliant with both GB 2626 2006 and therefore P2 standard. However because the individual masks are not branded with GB2626 2006 on each masks **we cannot mention or market that they are complaint with GB2626 2006 or P1**, as to be compliant this must be printed on the masks.
